

Wishes coming true

The Knights of Columbus Council 1297 is making wishes come true for dozens of Sacred Heart Academy teachers, gifting money for classroom items which positively impact hundreds of students in grades K through 12.

The Knights donated \$4,800 to purchase short-throw projectors for 12 elementary classrooms. These projectors connect to teachers' computers to create a large image on the classroom white board with the minimal space available. Students can see exactly what the teacher wants to project in vivid, sharp color. "Teachers want the projectors in their classrooms because they are such handy educational tools," said Julie George, Assistant Principal—Elementary. "We are fortunate to receive this generous gift from the Knights of Columbus because now every elementary classroom—and every teacher—will have one. This gift is a true blessing."

In addition to the projectors, the Knights of Columbus also donated \$600 for a classroom set of Texas Instruments TI-34 scientific multi-view calculators for 8th grade science use.
